Expiration Date: 0000-00-00 00:00:00

Description

Manufacturer Exporter of Buttweld Fittings that are Designed to Connect the Pipes by Welding. The Buttweld Fitting is used in branching, changing the direction or ending. The system that transports fluids in an efficient and safe manner makes use of butt weld fittings as its part. Other types of butt weld fittings could be socket welded or threaded. These are designed to be used as a part of the piping system for the purpose of branching, changing the pipe diameter, for changing the direction of pipes etc.
