Price: \$0.00

Date: 2018-03-26 07:53:00

Expiration Date: 0000-00-00 00:00:00

Description

Roughness tester is designed with the purpose to check the roughness of the surface. Roughness is the most important parameter to find out whether the surface is suitable for a particular purpose. A rough surface usually leads to corrosion and cracks. This tester is used to accurately determine the surface texture of a material. It also displays the results in micrometers and micron. India Tools & Instruments Co. is the leading Roughness Tester Manufacturers, we are well known for our quality and cost efficient products.
