

# Zirconia Liners

from: Southwest Oilfield Products FZCO

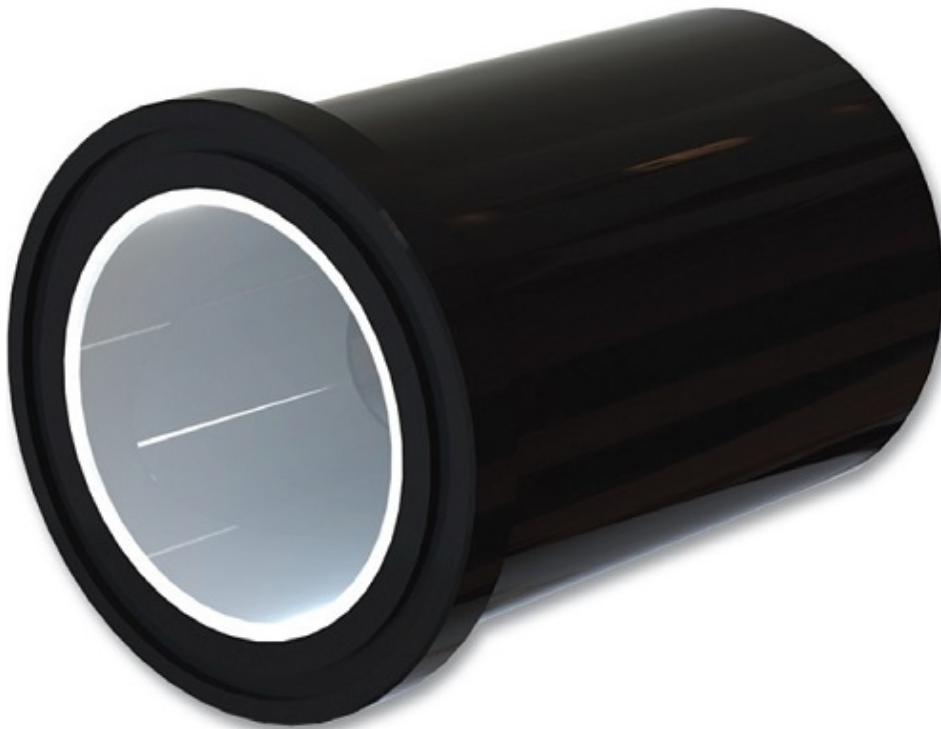

**Price:** \$0.00

**Date:** 2018-07-04 10:13:00

**Expiration Date:** 0000-00-00 00:00:00

## Description

Southwest Zirconia (CERAMIC) Liners have great hardness, low reactivity & high melting point. Zirconia liners are made using (ZrO<sub>2</sub>) Zirconium Dioxide which is a white crystalline oxide of the element zirconium. Lower pump down time when compared to using steel liners. Unlike other ceramic materials Zirconia is a non brittle element and significantly less prone to cracking.
