

Date: 14-Oct-2020

Good morning,

My name is Ksenia Akulova, I am Senior procurement specialist for Enquest Britain Ltd.

We are currently looking for an electrically driven submersible motor pump. These are the main parameters; you can see them on the drawings in the next page:

- 44730 total length
- 900 diameter
- 830kW motor, 3.3kV, 3-phase, 50Hz
- 1738 M3/hr @ 117m Head

The requirement is for our offshore platform Magnus in the North sea.

Kindly let me know if that is something you could supply and do not hesitate to contact me for any further details.

Thank you!

Best Regards,

Ksenia Akulova
Senior Procurement Specialist (Magnus and Subsea)
Enquest
