GREENMAX Styrofoam Densifier melts Styrofoam into ingots by crushing them into small pieces, melting them down and eventually they can be extruded and put into containers. Thermal densifier offers a compressing ratio of 90:1. After the hot ingots cool down, stack them on pallets for convenient storage. INTCO also provides a buy-back service. Production Capacity 200 kg per hour / 440 lbs per hour GREENMAX is a specialist in Styrofoam/ EPS foam recycling machine, including Styrofoam compactor, Styrofoam densifier, beverage dewatering machine and so on, which is a high-tech manufacturing and recycling economy business focusing on Styrofoam recovery, regeneration and utilization.
