Bolting and Bolted Joint Integrity

Our teams of highly trained and experienced service engineers make leak-free bolted connections safely and competently and with full regard to the environment. We use innovative, purpose-designed products to ensure that all bolting operations, will be carried out efficiently and safely. Our well-trained crews will ensure that correct bolt loads are achieved and not just applied. We pride ourselves in providing an unrivaled quality of service and value for money. Controlled Bolting - Torque and Tension Gasket Access - Flange Spreading Pipe Alignment - Flange Pulling Seized Nut Splitting Ultrasonic Bolt Load Management
