Bolting and Bolted Joint Integrity

Our teams of highly trained and experienced service engineers make leak-free bolted connections safely and competently and with full regard to the environment. We use innovative, purpose-designed products to ensure that all bolting operations, will be carried out efficiently and safely. Our well-trained crews will ensure that correct bolt loads are achieved and not just applied. We pride ourselves in providing an unrivaled quality of service and value for money.

Controlled Bolting - Torque and Tension
Gasket Access - Flange
Spreading
Pipe Alignment - Flange Pulling
Seized Nut Splitting
Ultrasonic Bolt Load Management
